

**PRESS RELEASE**

## Update to provisional MA schedule

**Lyon, 8 June 2016 - AMOEBA (FR0011051598 - AMEBA)**, producer of a biological biocide capable of eliminating waterborne bacterial risk, today announced a revised schedule for its acquisition of provisional MA.

Amoéba indicates that the assessment report required to obtain provisional MA for France and Europe, initially scheduled to be delivered in May 2016, should be available during the second half of 2016.

As a consequence, the company has indicated that its projected sales in France and Europe should be shifted back by a half-year relative to the schedule announced. The first sales under the provisional MA are therefore expected at the start of 2017. The company has sufficient treasury to cope with this delay.

Fabrice PLASSON declares: *“We will take advantage of this delay of our plans by a few months to continue optimising our industrial yields. This will allow Amoéba to anticipate the strong demand expected in 2017 from our many European clients who are already waiting to be able to use our biological solution”.*

**About AMOEBA:** Based in Chassieu - France, AMOEBA develops a biological biocide capable of eliminating waterborne bacterial risk (legionella, pseudomonas, listeria, etc.). This entirely natural solution is presented as an alternative to the chemical treatments traditionally used in the industrial sector and complies with the new regulations in terms of environmental chemical emissions. In a worldwide market for chemical biocides estimated to be worth 21 bn€(1), AMOEBA is today concentrating on the segment of industrial air-cooled towers (ACT) estimated to be worth 1.7 €bn(2). AMOEBA is continuing with its regulatory procedures so as to obtain provisional MA for all European countries for the “Air Cooled Towers” application. AMOEBA is quoted on compartment C of the Euronext Paris stock exchange and joined the CAC® Small index on 21st September 2015.
